

"Take Your Child to Work Day" Book List

Here are some books about ***BEES*** that you may want to read. You can borrow these from your local public libraries, or purchase from bookstores.

Are You a Bee? : By Judy Allen, Tudor Humphries (Illustrator)

Reading Level: Ages 4-8

From the perspective of a honeybee, the backyard is a busy place. A young bee faces many challenges as it takes its place in the hive and joins in the work of the bee community.

The Beekeeper's Handbook: Diana Sammataro, Alphonse Avitabile, Roger A. Morse

Reading level: Ages 12 and up

Learn about the interesting world of beekeeping in this must-have reference! A great all-around book on this ancient art.

Bees: by Deborah Hodge

Reading level: Ages 4-7

This oversized volume is brimming with facts and fascinating figures about bees. Discover the world we share with these tiny, busy creatures that we depend on so much.

Honey in a Hive: by Anne F. Rockwell, S. D. Schindler (Illustrator)

Reading level: Ages 5-9

Readers will learn how bees form societies with leaders—the queen—and workers. Like people, their survival depends on every bee doing its part. Read and find out about bees, honey, and life in the hive.

Honeybees (Insects Series): by Martha E. H. Rustad, Gail Saunders-Smith (Editor), Gary A. Dunn

Reading level: Ages 6-9

Honey bees are especially hard to get close to because they are fragile and hard to catch. This book helps curious readers learn more about honey bees without harming the bee.

Killer Bees: by Elaine Landau

Reading level: Ages 6-9

Scientific information about the anatomy, habitats, behavior, and diet of killer bees, along with full-color photographs and a Fast Facts section, make this a must-read for anyone who is interested in killer bees and how they attack..

Peterson First Guides to Insects of North America

Reading Level: Ages 12 and up

Peterson First Guides are the first books the beginning naturalist needs. Condensed versions of the famous Peterson Field Guides, the First Guides focus on the animals, plants, and other natural things you are most likely to see.

Bees! (Time for Kids Series)

Reading Level: Ages 4-9

Did you know that as many as 70,000 honeybees can live and work together in one hive! Read this book and find out how it happens!

Life and Times of the Honeybee: by Charles Micucci

Reading Level: Ages 5-8

This fun book depicts the life cycle and habits of the honeybee, describing in detail the organization of the hive and the making of honey..

Evolution of the Insects: by David Grimaldi, Michael Engel

Reading Level: Ages 12 and up

Illustrated with 955 photo- and electron- micrographs, drawings, diagrams, and field photos, many in full color and virtually all of them original, this reference will appeal to anyone engaged with insect diversity--professional entomologists and students,
